B.Tech Computer Science and Engineering student specialising in AI & ML with a 9.48 CGPA. Experienced in building full-stack web applications and AI-powered systems using Python, JavaScript, React, FastAPI, Node.js, databases, LangChain, and LangGraph. Strong foundation in software development, REST APIs, database design, and problem solving, with 120+ LeetCode problems solved.

EDUCATION

Takshashila University (NIAT) — **Chennai, India**

Bachelor of Technology — Computer Science and Engineering (AI & ML) — *Expected 2029*

CGPA: 9.48 / 10.0

PROJECTS

AI Research & Document Intelligence Agent — Python, LangGraph, LangChain, FastAPI, ChromaDB, PostgreSQL, LLMs

- Built a multi-agent AI system decomposing research queries into retrieval, analysis, calculation, and verification tasks.
- Implemented RAG with ChromaDB for efficient information retrieval from large PDF and document collections.
- Developed Python tools for calculations, structured data extraction, source verification, and report generation.
- Exposed system via FastAPI with Pydantic request validation and persistent metadata storage.

NewsTrack — Newspaper Supply Chain & Distribution Tracking System — FastAPI, React, TypeScript, PostgreSQL, WebSockets

- Developed a full-stack platform for newspaper production, inventory, dispatch, and delivery operations.
- Built REST APIs using FastAPI, SQLAlchemy, Alembic, and JWT-based multi-role authentication.
- Implemented React and TypeScript interfaces with WebSockets for real-time tracking and route updates.
- Added stock ledger management, incident escalation, delivery tracking, and operational analytics.

TalentHub — Job Application & Recruitment Management System — React.js, Node.js, Express.js, PostgreSQL, JWT, bcrypt

- Developed a full-stack job board and ATS platform supporting dedicated workflows for candidates and recruiters.
- Built candidate portal for account management, job search, application submission with resume uploads, and real-time status tracking.
- Implemented recruiter ATS dashboard to post/edit/delete jobs, manage applicant profiles, schedule interviews, and update application stages.
- Designed RESTful APIs and PostgreSQL schema with JWT authentication, role-based authorization, search, filtering, and pagination.

TECHNICAL SKILLS

Languages:	Python, C++, JavaScript, TypeScript, SQL, HTML5, CSS3
Spoken Languages:	English, Telugu
Frontend:	React.js, Bootstrap, Tailwind CSS
Backend & APIs:	Node.js, Express.js, FastAPI, REST APIs, WebSockets
Databases:	PostgreSQL, MongoDB, SQLite, ChromaDB
AI & Automation:	LangChain, LangGraph, LLMs, Groq, Agentic Workflows, n8n, Google AI Studio
Tools & Platforms:	Git, GitHub

ACHIEVEMENTS & ACTIVITIES

- **LeetCode:** Solved 120+ problems (Rating: 1510)
- **Smart India Hackathon (SIH):** Participant
- **Workshops:** Gesture Tech, Hack the Human Signal, Autonomous Vehicle, Breaking into IoT

INTERESTS

- Artificial Intelligence & Machine Learning
- Data Science & Data Analytics
- AI Automation & Agentic Workflows
- Web Development & Emerging Technologies
